

Why do we  
need to talk  
about climate  
change?

## Take it further:

### THINK

What curiosity questions can you ask?

*e.g. What does climate change mean? Why is the climate changing? Why do some people not want to talk about climate change? Who do you have that you can talk to?*

### FEEL

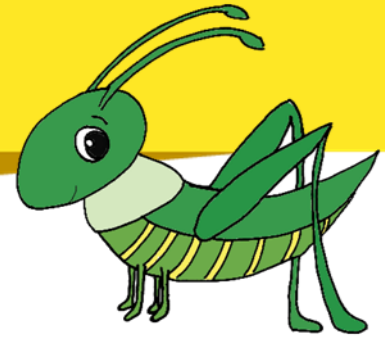

How might different people feel about this?

*e.g. What are some of the feelings that you have when you think about climate change? Where in your body do you experience these sensations? What helps you to feel calm and secure when thinking and feeling about climate change?*

### CONNECT

What links can you start to make?

*e.g. Why is it good for us to be about climate change? Why is it good to share how we are thinking and how we are feeling with other people?*

## Activity ideas:

1. What is climate change? What is the difference between climate and weather? Read our short story book about Vole and friends and join them on a journey to find out more by talking about climate change:

[Vole's Big Flood](#)

2. Talking with others, sharing how we feel and the things we have learned can help others to understand what is happening with climate change. Some people find it very easy to talk about the issues and ideas surrounding climate change, whilst some people don't wish to talk about it at all. Having simple conversations really can encourage people to think about changes they can make in their own lives – small pledges that can make a big difference and feel great to take.

To help start your conversations, have a think about a pledge you might like to make for the planet and follow the instructions on this worksheet: [Pledge for the Planet](#)

3. Want to know more about climate change and what it means and start some simple conversations in your family? Download our free Changing Climates discussion-based programme for 5-18 year olds and start talking about climate change in your family:

[Changing Climates Curriculum](#)

4. Why not take a journey into Earth School and explore the 30 quests for students around the world to celebrate, explore and connect with nature. Watch the video to find out more:
